ECONOMIC CONDITIONS IN FEBRUARY

Further substantial improvement was shown by industrial production in January. Production of pig iron was January. the largest on record. Output of steel ingots moved up a further 5 per cent and production of both steel and passenger automobiles reached the highest level since last May. Activity in the rubber industry moved ahead rapidly and consumption of crude and synthetic rubber increased 18 per cent to establish a new high point. Advances in these and other lines were reflected in heavier demands for electric power and total production of central electric stations reached a new peak. sumption of primary power was more than 6 per cent greater than in December.

-91

Notwithstanding these gains seasonal declines in employment in construction and other industries coupled with severe weather in some areas caused a further rise in unemployment. number of persons on the live unemployment insurance register rose by about 20,000 during January but the number registered at the end of the month about 104,000, was still over 40,000 less than at the same date in 1946. A shortage of freight cars combined with severe weather has in some instances led to delays in shipments. But the total number of revenue cars loaded up to March 8 is over 18,000 greater than in the same period of 1946. Carloadings of grain, livestock and coal are down substantially as compared with a year ago but this has been more than offset by increased loadings of lumber and other building materials, petroleum products, iron and steel products and merchandise in less than carload lots. Average hourly earnings in manufacturing industries recorded a further advance at the first of the year to bring the total increase since August to 6.2 cents, the recent gain being the result of small increases in a large number of industries.

Agriculture

During 1946 continued rationing accompanied by further price increases reduced per capita consumption of meat to 130 lbs. as compared with 143 in 1945. Total meat production declined by about 15 per cent and exports were reduced by almost 20 per cent. In all instances, in consumption, output and exports, the sharpest decline occurred in pork products. Nor do recent statistics offer much prospect for an increased supply of meat in the near future. Data on inspected slaughterings up to the first of March show that marketings of beef cattle are down 30 per cent over the same period a year ago and marketings of hogs are lower by 23 per cent. Though part of this decline may have been due to adverse weather conditions, it also reflects a declining trend in production. An estimate of the number of cattle on farms at December 1 (excluding milk cows) showed a further decline of 2.7 per cent from the number a year earlier. Though a larger crop of pigs is expected this spring, it will not lead to increased marketings until the fall of the year. Price increases on beef which were announced recently are designed to encourage marketings during the next few months and avoid a shortage of meat such as developed a year ago. Cold storage holdings at the first of March were slightly below their level of a year ago.

Sales of fluid milk expanded sharply in the first half of 1946, but following price increases in June and October demand has fallen off. Sales in January were at about the same level as the same month a year ago. Total milk production has shown some improvement in recent months, even though the number of milk cows on farms at December 1 were down a little more than 1 per cent, when compared with December, 1945.

Construction

Preliminary estimates place the number of dwelling units completed in 1946 at slightly over 59,800, just short of the government's original goal of Because of fire losses and 60.000. the net addition to demolitions. Canada's supply of homes would be somewhat less than indicated. A target of 80,000 units has been set for 1947, and information up to the end of February indicates that awards of contracts for the construction of new dwelling units are down about 15.6 per cent from the same months in 1946. Awards were made for 1.712 dwelling units for the first two months of 1947 as compared with 2,027 units in 1946. Construction of 80,000 dwelling units would be equivalent to the addition of about 3 per cent to the number of units available in 1941.

The Dominion Government has announced plans to stimulate the construction of a greater amount of rental housing. Under this program owners building to rent units of an approved type with a maximum rental of \$70.00 per month will receive priorities on materials and will be allowed double depreciation and longer period amortization loans under the National Housing Act. Another plan calls for legislation to allow life insurance companies to acquire and develop housing areas. In recent years construction of apartment units has declined considerably relative to total residential construction and, though there has been some rise during 1946, this type of construction is still a smaller part of the total than it was in earlier periods. Notwithstanding the urgent needs for additional housing, the major advances in construction during 1946, on the basis of the value of contracts awarded. were in the non-residential field. While awards for residential construction increased by less than 10 per cent from their total in 1945, contracts for other construction more types of than doubled.

The pattern of controlled advances in Canadian price levels has continued in recent months. Particularly sharp

advances have occurred in the wholesale prices of industrial materials and this index has increased over 13 per cent since the beginning of the year. Following a small drop in December. the cost of living index moved up almost another point during January to bring the increase from its average 1935 to 1939 level to 27.8 per cent. Though the average increase is relatively small, this average includes many substantial price rises. Thus food prices have increased by 47 per cent in this same period and some individual foods are higher by over 75 per cent. Offsetting these large increases and contributing to the smaller average gain have been the price stability shown by the index of fuel and light which has risen less than 10 per cent and the index of rents which is greater by only 13 per cent. Resumption of the upward movement in commodity prices has occurred in United States and this may delay a narrowing of the present disparity between price levels in Canada and United States.

Consumers' Durables.

Despite the interruptions caused by industrial disputes and a shortage of materials, production of most con-sumers' durables was back to or above pre-war levels in 1946. One of the best gains was shown in the production of radios. Producers' shipments of receiving sets amounting to 568,320 sets were well above the previous high point of 438,976 reached in 1940. Production in December reached a new maximum of over 80,000 units. Production of electric refrigerators and domestic washing machines rose, in both instances, to about 90 per cent of the previous high position reached in 1941.

Production of passenger automobiles still had some distance to go to reach pre-war levels. The 92,456 units produced in 1946 was only about 60 per cent of the number turned out in 1937. But a higher proportion of trucks and buses was produced in 1946 and total automobile production was up to 83 per cent of the 1937 level. On the basis of the higher income levels now prevailing and the still unsatisfied backlog of demand accumulated for cars and trucks during the war, a considerable further advance in sales should be possible.

Retail and Wholesale Sales.

Dollar sales of retail stores in January, 1947, were 13 per cent greater than in the same month of 1946, about the same average gain as was shown throughout the year. Somewhat easier supply conditions are indicated by the reappearance of clearance sales of women's apparel, and these were reflected at the sales level in the 26 per cent gain shown by women's clothing stores and the 20 per cent increase for family clothing stores. Sales in furniture stores showing one of the largest gains during the past year have been aided substantially by the payment of re-establishment credits to veterans. Of the \$100 million paid on this account, over 50 per cent has been for furniture and household equipment. As to the regional picture, sales increases in the Maritimes continue to lag well behind those in the rest of Canada.

Though dollar sales have been moving steadily upward, there is evidence that the real volume of goods sold has been levelling off. When the index of retail sales is adjusted for changes in retail prices, it has been in recent months only 4 per cent above its level of the corresponding month a year ago compared with 6 to 8 per cent several months ago and 12 to 13 per cent in the spring and early summer of 1946.

een

f 0 h).

a

d

n

t

d

r. 7. d al is At the wholesale level a flattening out even in dollar sales is indicated by sales results for recent months. Compared with the same month of the preceding year, sales in January and December were respectively 9.4 per cent and 13.8 per cent greater in contrast to an average gain of 18.7 per cent for the whole year of 1946. Accompanying this trend, there have been increases in inventories in almost all trades, and at the end of January the dollar level of inventories was 29 per cent greater than a year ago.

Finance

In recent years savings of individuals have to an increasing extent been going into the notice deposits of the chartered During 1946, these deposits increased by \$604 million in comparison with an increase of \$442 million in 1945, \$475 million in 1943, and an average increase of \$58 million in the three years 1936-1938. The record increase during 1946 was partly due to the absence of the semi-annual Victory Loan drives which in previous years caused a substantial transfer from deposits into government securi-On a smaller scale a similar transfer began in October, 1946, when the Canada Savings Bonds went on While in recent years the proceeds of these savings have been invested largely in government securities, in the future they may have to find outlets to a greater extent in financing The chartered private investment. banks already show signs of such a trend, evidenced by the increase of \$359 million in their Canadian loans (excluding call loans and loans to enable subscribers to purchase Victory or Canada Savings Bonds) and by the rise of \$113 million in their nongovernmental security holdings. Funds have also been supplied to private investors indirectly by their sale of government securities to the banks. In January these trends continued, as notice deposits increased \$64 million and the banks' holdings of other securities advanced by \$58 millions.

One other important recipient of individuals' savings, life insurance companies, increased their sales of new insurance during 1946 by 41 per cent over sales in 1945. Despite this gain, the total of life insurance in force is still substantially smaller relative to net national income than it was in 1938. Thus in 1945 the total of ordinary, industrial and group life insurance in force amounted to only 102 per cent of net national income, whereas in 1938 the same percentage was 168. As a consequence, a much smaller proportion of individuals' savings is currently received by life insurance companies than in pre-war years.

SITUATION ÉCONOMIQUE EN FÉVRIER

De nouveau la production industrielle s'améliore sensiblement en janvier. La production de fonte en gueuses est la plus forte jusqu'à présent. Le ren-dement de lingots d'acier augmente d'un nouveau 5 p.c.; la production d'acier et de voitures de tourisme atteint son point le plus élevé depuis mai dernier. L'activité dans l'industrie du caoutchouc augmente rapidement et la consommation de caoutchouc brut et de caoutchouc synthétique avance de 18 p.c. pour établir un nouveau Les gains dans ces séries sommet. d'articles et dans d'autres se reflètent dans la plus grande demande d'énergie électrique. Le rendement global des centrales électriques touche un nouveau maximum. La consommation d'énergie primaire est de plus de 6 p.c. plus élevée que celle de décembre,

nent

En dépit de ces gains, des déclins saisonniers de l'emploi dans la construction et d'autres industries, accompagnés de grands froids dans certaines régions, entraînent une nouvelle augmentation du chômage. Le nombre de personnes dont les noms paraissent au registre actif de l'assurance-chômage augmente d'environ 20,000 en janvier, mais le nombre enregistré à la fin du mois, soit quelque 104,000, est quand même de plus de 40,000 inférieur à celui de la même date de 1946. La rareté de wagons de marchandises, ajoutée à un temps rigoureux à divers endroits, retardent les expéditions. Toutefois, le total de wagons de marchandises payantes chargés jusqu'au 8 mars dépasse de plus de 18,000 celui de la période correspondante de 1946. Les chargements de grain, de bétail et de charbon diminuent sensiblement comparativement à l'an dernier, mais ce déclin est plus que contre-balancé par les chargements plus considérables de bois d'œuvre et d'autres matériaux de construction, de produits pétroléens, de produits du fer et de l'acier et de marchandises de moins d'un plein wagon. Le gain horaire moyen dans les industries manufacturières augmente de nouveau au début de l'année, portant l'augmentation totale depuis août à 6·2 cents; le gain récent découle de petites augmentations dans un grand nombre d'industries.

Agriculture

En 1946, la continuation du rationnement accompagnée de nouvelles hausses de prix réduisent la consommation de viande per capita à 130 liv, en comparaison de 143 liv en 1945. production totale de viande décline d'environ 15 p.c. et les exportations, d'à peu près 20 p.c. Dans tous les cas, pour ce qui a trait à la consommation, à la production et aux exportations, le déclin le plus brusque se fait sentir dans les produits du porc. Les statistiques récentes ne laissent guère espérer une augmentation prochaine des approvisionnements. Les données relatives aux abattages inspectés, jusqu'au premier mars, révèlent que les ventes de bêtes à cornes de boucherie ont baissé de 30 p.c. par rapport à la même période l'an dernier et celles de porcs, de 23 p.c. Bien que ce déclin soit attribuable en partie à la température défavorable, il reflète par ailleurs une tendance à la baisse de la production. Une estimation du nombre de bêtes à cornes sur les fermes le 1er décembre (sans compter les vaches laitières) montre un nouveau déclin de 2.7 p.c. auprès d'il y a un an. Bien qu'une plus forte production de porcs soit prévue au printemps, elle n'occasionnera pas une augmentation des ventes avant l'automne de cette année. La hausse du prix du bœuf, annoncée récemment, a pour fin de faciliter l'écoulement au cours des quelques prochains mois et d'éviter une disette de viande comme celle d'il y a un an. Les stocks en entrepôts frigorifiques au début de mars sont quelque peu au-dessous de leurs niveaux d'il y a un an.

Les ventes de lait fluide augmentent brusquement durant le premier semestre de 1946, mais, à la suite de la hausse de juin et d'octobre, la demande diminue. Les ventes en janvier occupent à peu près le même niveau que durant le même mois l'an dernier. La production laitière globale s'améliore depuis quelques mois, bien que le nombre de vaches laitières sur les fermes, le ler décembre, soit inférieur d'un peu plus de 1 p.c. à celui de décembre 1945.

Construction

Des estimations préliminaires établissent le nombre d'unités de logement terminées en 1946 à quelque peu plus de 59,800, soit très peu inférieur au nombre de 60,000, projeté par le Gouvernement. En raison des pertes par le feu et des démolitions, l'augmentation nette du nombre de maisons canadiennes serait quelque peu inférieur au total indiqué ci-haut. objectif de 80,000 unités a été fixé pour 1947; les renseignements obtenus jusqu'à la fin de février démontrent que les adjudications de contrats relatifs à la construction de nouvelles unités de logement sont de 15.6 p.c. au dessous de celles des mêmes mois de 1946. Durant les deux premiers mois de 1947, des contrats pour 1,712 unités de logement sont adjugés, en comparaison de 2,027 unités en 1946. La construction de 80,000 unités de logement équivaudrait à une augmentation d'environ 3 p.c. du nombre d'unités disponibles en 1941.

Le gouvernement du Dominion annonce un programme destiné à stimuler la construction d'un plus grand nombre de logements à louer. Grâce à ce programme, les propriétaires qui construisent en vue de louer des logements d'un genre approuvé, avec un loyer maximum de \$70.00 par mois, jouiront de priorités sur les matériaux, d'une double dépréciation et de prêts à plus longue échéance, subordonnément à la loi nationale sur l'habitation. Un autre programme comporte une loi permettant aux compagnies d'assurance-vie d'acquérir et de créer des districts d'habitations. Ces dernières années. la construction de maisons d'appartements décline considérablement comparativement à la construction totale de maisons et, bien qu'il se produise quelque augmentation en 1946, ce genre de construction demeure, par rapport au total, proportionnellement moins élevé que durant les périodes antérieures. En dépit de la nécessité urgente d'un plus grand nombre de maisons, les principales augmentations de la construction en 1946, en se fondant sur la valeur des contrats adjugés, se produisent dans la construction non résidentielle. Alors que les adjudications pour la construction de logements augmentent de moins de 10 p.c. comparativement à 1945, les contrats pour d'autres genres de construction font plus que doubler.

La tendance générale de l'augmentation surveillée des prix canadiens demeure la même ces récents mois. Les prix de gros des matériaux industriels accusent une hausse particulièrement brusque et l'indice augmente de plus de 13 p.c. depuis le début de l'année. Après un léger déclin en décembre, l'indice du coût de la vie gagne presque un autre point en janvier, portant l'augmentation à 27.8 p.c. comparativement à la movenne de 1935-1939. Bien que l'augmentation movenne soit relativement faible, cette moyenne comprend plusieurs hausses de prix sensibles. Ainsi, les aliments renchérissent de 47 p.c. durant cette même période et certains aliments en particulier coûtent plus de 75 p.c. plus cher. La stabilité des prix démontrée par l'indice du combustible et de l'éclairage, dont la hausse n'atteint pas 10 p.c., et l'indice des loyers, qui ne gagne que 13 p.c., font contre-poids à ces augmentations prononcées et contribuent à établir le gain moyen à un niveau peu élevé. Aux Etats-Unis, les prix de denrées reprennent leur mouvement vers la hausse, ce qui peut retarder le redressement de l'écart actuel entre les niveaux de prix canadiens et américains.

Ventes de détail et de gros

Les ventes en dollars des magasins de détail en janvier 1947 sont de 13 p.c. plus fortes que durant le même mois de 1946, soit à peu près le même gain moyen que pendant la guerre. La 17

La

reprise des ventes d'écoulement de vêtements de femmes est une indication de l'amélioration de la situation des approvisionnements. Cet état de choses se reflète dans les ventes qui augmentent de 26 p.c., dans les magasins de vêtements de femmes et de 20 p.c., dans les magasins de vêtements pour toute la famille. Les ventes des magasins de meubles, qui enregistrent les gains les plus élevés cette dernière année, profitent grandement des versements de crédits de réadaptation aux anciens combattants. Des \$100 millions de dollars versés à cette fin, plus de 50 p.c. est dépensé pour l'achat de meubles et d'accessoires ménagers. Quant à la situation régionale, l'augmentation de ventes dans les Maritimes demeurent bien inférieure a celle du reste du Canada.

Bien que les ventes en dollars augmentent régulièrement, certaines indications font voir que le volume réel de marchandises vendues se stabilise. Lorsque l'indice des ventes de détail est ajusté pour tenir compte des fluctuations des prix de détail, il n'est ces derniers mois, que de 4 p.c. audessus de son niveau du mois correspondant l'an dernier, en comparaison de 6 à 8 p.c. il y a plusieurs mois et de 12 à 13 p.c. au printemps et au début de l'été de 1946.

Au niveau du commerce de gros, les résultats de 5 ventes des quelques derniers mois indiquent une stabilisation même des ventes en dollars. En comparaison du même mois l'année précédente, les ventes en janvier et décembre sont respectivement de 9·4 et de 13·8 p.c. plus élevées, en contraste avec un gain moyen de 18·7 p.c. au cours de l'année entière de 1946. De pair avec cette tendance, il se produit des augmentations des stocks dans presque tous les commerces; à la fin de janvier, le niveau en dollars des stocks dépasse de 29 p.c. celui d'il y a un an.

Finances

Ces récentes années, les économies de particuliers vont de plus en plus dans les dépôts à préavis des banques à charte. En 1496, ces dépôts augmentent de 604 millions de dollars contre un gain de 442 millions de

dollars en 1945, 475 millions de dollars en 1943 et un gain moven de 58 millions de dollars durant les trois années de L'augmentation sans pré-1936-1938. cédent en 1946 découle en partie de l'absence de l'emprunt semi-annuel de la victoire qui, les années précédentes, occasionnait un transfert considérable de dépôts en fonds d'état. Un transfert semblable, sur une plus faible échelle, mais dans des proportions limitées, se produit en octobre 1946, lorsque les obligations d'épargne du Canada sont mises en vente. Bien que durant ces dernières années le produit de ces épargnes ait été engagé en grande partie dans des fonds d'état, il devra peut-être être dirigé davantage vers le financement d'entreprises pri-Les banques à charte donnent déjà des signes d'une telle tendance, comme le démontre l'augmentation de 359 millions de dollars de leurs prêts canadiens (exclusion faite des prêts remboursables sur demande et des prêts permettant aux souscripteurs d'acheter des obligations de la victoire ou d'épargne du Canada) et la hausse de 113 millions de dollars de leurs stocks de valeurs mobilières non d'état. Les portefeuillistes particuliers ont aussi obtenu indirectement des fonds par la vente de fonds publics aux banques. Ces tendances persistent en janvier; les dépôts à préavis augmentent de 64 millions de dollars et les stocks des banques en d'autres valeurs mobilières, de 58 millions de dollars. Les compagnies d'assurance-vie, qui ont reçu aussi une large part des économies de particuliers voient leurs ventes de nouvelle assurance augmenter de 41 p.c. en 1946 par rapport à 1945. En dépit de ce gain, le total de l'assurance-vie en vigueur demeure plus bas comparativement au revenu national net qu'en 1938. Ainsi, en 1945, le total de l'assurance-vie ordinaire, industrielle et de groupe en vigueur ne s'élève qu'à 102 p.c. du revenu national net, tandis qu'en 1938 le même pourcentage s'établissait à 168. Par conséquent, une proportion beaucoup plus faible des épargnes des particuliers va aux compagnies d'assurance-vie qu'au cours des années d'avant-guerre.

Bureau fédéral de la Statistique, le 31 mars 1947.

¹ Source: Housing Statistics published by Public Finance Branch, based on a survey through 623 municipalities; includes unorganized areas of the provinces, and also the Northwest Territories and Yukon.

² Includes returns from the Northwest Territories and Yukon.

² These totals do not necessarily represent completions during the month of December, since some of the reporting agencies submitted returns during this month which covered all of the new dwelling units completed in the year 1946, and it is impossible to allocate these according to months.

⁴ Subject to revision.

⁵ Summer cottages are excluded from all the figures appearing above this line.

REPORT ON THE GRAIN TRADE OF CANADA FOR THE CROP YEAR ENDED JULY 31, AND TO THE CLOSE OF NAVIGATION 1944-45. 101 p., 50 cents.

HONEY CROP REPORT 1946, 2 p., 10 cents.

Hops 1946. 1 p., 10 cents.

Estimates of the Output and Slaughter of Meat Animals and Consumption of Meats in Canada, 1946, 4 p., 10 cents.

LIVESTOCK SURVEY, December 1, 1946. 3 p., 10 cents.

LIVESTOCK AND ANIMAL PRODUCTS STATISTICS, 1945. (Eng. and French) 82 p., 50 cents.

Fisheries.

Advance Report of the Fisheries of Nova Scotia, 1945. 12-1022, 13 p., 10 cents.

MONTHLY REVIEW OF CANADIAN FISHERIES STATISTICS, January 1947. 12-403X. 12 p., (new).

Manufactures.—

GEOGRAPHICAL DISTRIBUTION OF THE MANU-FACTURING INDUSTRIES OF CANADA, 1944. 63 p., 50 cents.

STOCKS AND CONSUMPTION OF UNMANUFACTURED TOBACCO DURING THE QUARTER ENDING DECEMBER 31, 1946 (incl. June 30, 1934 to Dec. 31, 1946) (Eng. and French) 14-3910, 5 p., 50 cents a year.

Manufacturers.—Continued

REPORT ON THE WINE INDUSTRY IN CANADA, 1945. 14-1460, 9 p., 25 cents.

REPORT ON THE BISCUIT, CONFECTIONERY, COCOA AND CHOCOLATE INDUSTRIES IN CANADA, 1945. 23 p., 25 cents.

THE LEATHER FOOTWEAR INDUSTRY, CANADA, 1945, 12-1330 (Eng. and French) 27 p., 25 cents.

LEATHER GLOVES AND MITTENS, CANADA, 1945. 12-1340. 13 p., 20 cents.

MISCELLANEOUS LEATHER GOODS, LEATHER BELTING AND LEATHER BOOT AND SHOE FIXDINGS IN CANADA, 1945. 12-1350. 23 p., 25 cents. THE LIME INDUSTRY IN CANADA, 1945. A 17-19-2-47. 8 p. 25 cents.

Census of Merchandising and Service Establishments.—

RETAIL CHAINS IN CANADA, 1945. 16-1050. 10 p., 25 cents.

Transportation and Public Utilities.—

STEAM RAILWAY EMPLOYEES AND THEIR COMPENSATION 1926-1945. 20-7040. 21 p., 50 cents.

Telephone Statistics for 1945. 20-1410, 24 p., 25 cents.

Education .-

ELEMENTARY AND SECONDARY EDUCATION IN CANADA, 1943-44 (8-1010P) 114 p., 50 cents.

Canadian Census Occupational Data for Counsellors (Education Bulletin No. 1, 1947) 8-7050, 166 p., 50 cents.

SUPPLY AND DEMAND IN THE PROFESSIONS IN CANADA, (Eng. and French) 8-7040. 67 p., 25 cents.

Business Statistics.—

COMMERCIAL FAILURES IN THE CALENDAR YEAR, 1946. 3-1050. 6 p., 50 cents.

PUBLICATIONS REGULARLY ISSUED BY THE DAY, WEEK, MONTH OR QUARTER

Daily Bulletins.—The daily bulletin (Eng. and French)—\$1.50 per year.

Weekly Bulletins.—Canadian grain statistics. Carloadings of revenue freight. The weekly bulletin—\$1.00 per year.

Monthly Reports .-

VITAL STATISTICS.—Births, deaths and marriages registered in cities.

AGRICULTURE.—The wheat situation. Milling Statistics. Cold Storage holdings of meat and lard. Dairy review. Cold storage holdings of dairy and poultry products. Stocks of butter, cheese and eggs. Storage stocks of fruit and vegetables. Sugar Report.

FISHERIES.—Cold storage holdings of fish.

MINING.—Leading minerals. Gold, coppernickel, silver-lead-zinc. Clay products and petroleum and natural gas. Asbestos. Cement. Salt. Coal and Coke.

Manufactures.—Boot and shoe production. Asphalt roofing production. Asphalt roofing sales. Pig iron, steel and ferro-alloys. Steel ingots. Steel wire. Nails, tacks and staples. Wire fencing. Non-ferrous scrap metal, dealers' report. Ingot makers' report on non-ferrous scrap metal and secondary nonferrous ingot. Factory sales of electric storage batteries. Radio receiving sets. Domestic washing machines. Domestic-type electric refrigerators. Refined petroleum products. Sales of manufactured and natural gas. Products made from Canadian clays. Rock wool. Concrete building blocks and cement pipe. Paints, varnishes and lacquers.

CONSTRUCTION.—Building permits.

EXTERNAL TRADE. — Trade of Canada (Totals). Exports by principal commodities. Imports by principal countries. Exports of Canadian produce. Imports entered for consumption: Nos. 101, 102. Imports of Milk and its products and eggs; No. 103, Imports of Rubber; No. 104, Exports of Rubber and Insulated Wire Cable; Nos. 111, 112, Imports of Paints and Varnishes; No. 113, Imports of Lumber; No. 114, Exports of Lumber; No. 117, Inports of Farm Machinery and Implements; No. 118, Exports of Farm

Implements and Machinery; No. 119, Imports of Pulp, Wood Pulp and Paper; No. 120, Exports of Pulpwood, Wood Pulp and Paper; No. 123, Exports and Imports of Tobacco; No. 203, Imports and Exports of Coffee and Tea; No. 204, Imports and Exports of Hides and Skins; No. 207, Imports of Stoves, Sheet Metal Products and Refrigerators; No. 208, Imports and Exports of Vegetable Oils; No. 209, Imports and Exports of Fertilizers; No. 210, Imports and Exports of Wire of Iron and Steel.

Sales and Purchases of Securities between Canada and other Countries. Highway Traffic at Canadian Border Points by Ports.

INTERNAL TRADE.—Indexes of Wholesale Sales. Indexes of Retail Sales. Indexes of Country General Store Sales. Current Trends in Food Distribution. Financing of Motor Vehicle Sales. Stocks of Raw Hides and Skins in Canada. Departmental Store Sales.

LABOUR AND PRICES.—Price movements in Canada (preliminary). Prices and price indexes. Employment and Payrolls. Statistical report on the operation of the Unemployment Insurance Act.

Transportation, Communication and Public Utilities.—Railway Revenues, Expenses, Incomes and Operating Statistics. Freight Traffic of Railways. Output of Central Electric Stations. Civil Aviation Operating Statistics.

Business Statistics.—Cheques cashed against Individual Accounts at the Clearing House Centres of Canada and the Money Supply. Monthly Review of Business Statistics.

GENERAL.-A Fact a Day about Canada.

Quarterly Reports.-

VITAL STATISTICS.—Preliminary Report on Vital Statistics of Canada.

AGRICULTURE.—Quarterly Bulletin of Agricultural Statistics with Annual Index. Quarterly Review of Canadian Coarse Grains.

Manufactures.—Stocks of Unmanufactured Tobacco on Hand. Stocks of Canned Fruits and Vegetables. Galvanized Sheets. Production and Sales of Radio Sets. Sales of Storage Batteries.

INTERNAL TRADE.—New motor vehicle sales.
Business Statistics.—Commercial failures.
